

Birth Management Clinic for Sheep and Goats

- Are you interested in learning how to improve birth management of your herd or flock? If so, sign up for this fun and highly informative clinic! The clinic will be held on the MSU campus and will utilize the new MSU sheep barn which is specialized for cold weather birth.
- Participants will learn preventative management approaches and assessment skills as well as treatment procedures through both discussion and hands-on activities from Dr. Richard Ehrhardt, MSU small ruminant specialist. Both novice and veteran producers alike will find this program valuable. In addition students that have attended this program more than once have found it valuable due to the enormity and depth of content provided.
- **Topics covered include:** nutritional management, use of ultrasound, facility design, newborn care, hypothermia treatment, grafting, vaccination protocols, mortality diagnoses, health and feeding program assessment.

February 3, 2018
